

JOHN LUIS D. PEPITO

Centro Alaska, Mambaling, Cebu City, Cebu, 6000

luis.pepito789@gmail.com

09620413098

IT student who has developed web applications and solved programming problems. Comfortable in, and excited about working in, tech stacks such as Java, Python and React, but also open to new tools as needed. Detail-driven and constantly seeking to further develop my skills on the scale of real projects and collaborations.

PROJECT EXPERIENCE

PortfolioX - (Spring Boot, React, TailwindCSS)

January 2025 - Present

Backend Web Developer

- A student portfolio system designed to help students manage and showcase their personal information, skills, projects, and achievements. The system supports profile management, project listings, and authentication.

ECB - Spring Boot Version (Spring Boot, React)

August 2024 – December 2024

Full Stack Web Developer

- ECB is an electricity billing system that manages customer records, meter readings, billing calculations, and payment tracking. Built with OAuth and mobile app integration.

ECB - Django Version (Django, HTML/CSS, Javascript)

January 2024 – May 2024

Full Stack Web Developer

- This version uses Django's server-side setup to handle customer records, meter readings, billing computation, and monthly statements.
